# Text Inline Elements

`<mark>`

`<small>`

`<u>`

`<em>`

`<strong>`

`<s>`

`text-center, text-left, text-right`

`text-sm-left`

`text-wrap`

`text-break`

`text-primary`

`text-white`

◀ Align text

◀ Align left for certain viewport

◀ Wrap text

◀ Break on long words

◀ Text color to primary color

◀ Text to white

# Demo

## Working with type and text

# Using Bootstrap for Content Elements

---

# Demo

## Applying style on tables

# Demo

## Working with images

# Adding Layout Style Classes

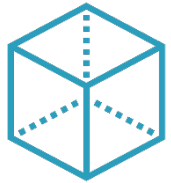

---

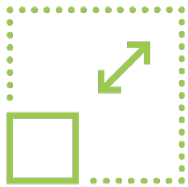

# Spacing Using Bootstrap

Support for padding (p) and margin (m)

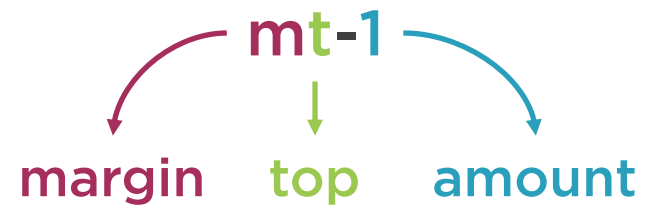

All properties or individual properties

Based on rem value

# Applying a Margin

```
<span class="border"></span>
```

```
<span class="border-bottom"></span>
```

```
<span class="border border-primary"></span>
```

## Adding Borders

# Demo

Adding style classes to our site

# Summary

## **Bootstrap helps on many levels**

- Traditional tables
- Images
- Spacing and alignment
